

Number/Numero:

PR-24-000245

This permit is issued under the authority of section 78.3 of the *Mining Act* and the Exploration Plans and Exploration Permits Regulation (O. Reg. 308/12). It is subject to the provisions of the Act and regulation as well as the terms and conditions included in this permit.

Ce permis est émis conformément aux dispositions de section 78.3 de la *Loi sur les mines* et des règlements et est sujet aux restrictions et dispositions de ce lois et règlements ainsi qu'aux conditions ci-énoncées.

Note: The issuance of this permit does not relieve the applicant from the responsibility of acquiring any other agency, board, government, etc. approval as may be required nor does it relieve the permittee from the requirements of any other legislation or guarantee access to the land.

Remarque : La délivrance de ce permis n'exempte pas le demandeur de l'obligation d'obtenir l'autorisation de tout autre organisme, commission, gouvernement, etc. qui pourrait être exigée, n'exempte pas le titulaire des dispositions de toute autre loi et ne garantit pas l'accès à la terre.

2. Exploration Logistics and Detailed Information

Will explosives be used for any activity/activities? If yes describe in detail which activities require the explosives, where they will be stored, and any other relevant information.

No

What commodity or commodities are being sought in the work program?

Gold

How will you be transporting personnel to the exploration site for all activities? Describe in detail.

Personnel are transported using 4x4 trucks and quads, using existing roads and trails where available.

How will you be mobilizing/demobilizing equipment to and from the exploration site for all activities? Describe in detail.

Equipment is mobilized/demobilized to the site using a low-bed trailer and dragged to sites using either a dozer or a skidder.

What type of equipment will you be using for all of the early exploration activities?

For drilling activities diamond drill and possible reverse circulation rigs will be used with dozers or skidders to move rigs from site to site. Dozers will be used for any trail building. Quads may be used to transport personnel and core. Excavator will be used to dig test sites.

What type of drilling will take place? (e.g. core drilling, reverse circulation)

Dominately diamond drilling with possible reverse circulation, sonic and overburden drilling

Do you anticipate the removal of the drill casing?

☐ Yes ☒ No

If yes, when will you be removing it?

☐ Immediately ☐ 3 to 6 months ☐ 6 to 12 months ☐ 1 to 2 years

For the exploration activities you have selected in your early exploration submission please fill in the associated details (required for all activities proposed).

Geophysical surveys requiring a generator	► Type of Survey	
Line cutting	► Estimated total line length	metres
Mechanized Stripping	► Planned Number of stripped locations	90
	Estimated total area of stripping	900 square metres
Pitting and Trenching of Bedrock	► Planned Number of Pits/Trenches	
Mechanized Drilling	► Planned drill hole diameter	7.57 centimetres
	☐ 1 - 5 pads	
	☐ 6 - 10 pads	
	☐ 11 - 15 pads	
	☐ 16 - 20 pads	
	☒ > 20 pads	

Please identify any non-prescribed activity/activities you will be undertaking to support the prescribed early exploration activity/activities

☒ Creating trails for the purposes of early exploration

☒ Creating roads for the purposes of early exploration

☐ Creating/setting up camp(s) to house personnel to perform your prescribed early exploration activities

Number of people in camp Number of camps

☐ Ground geophysical surveys without a generator

☐ Airborne geophysical surveys

Are you planning to store fuel or other hazardous materials on the property?

☐ Yes ☒ No

Please provide any other information relevant to this project.

Proposing 90 overburden test sites 5m x 2m x <6m deep. See attached photo.

“Test pits are proposed to investigate the shallow overburden characteristics, to observe excavation stability, assess the depth to ground water and retrieve samples for geotechnical soil characterization via laboratory testing and visual and tactile inspection. Small samples of the soil (2kg maximum) would be taken from each soil stratum encountered. The test pits would be backfilled and compacted with topsoil / organics reinstated at the surface upon completion of excavation”.
