## 2. Exploration Logistics and Detailed Information

Will explosives be used for any activity/activities? If yes describe in detail which activities require the explosives, where they will be stored, and any other relevant information.

No

What commodity or commodities are being sought in the work program?

Lithium

How will you be transporting personnel to the exploration site for all activities? Describe in detail.

A helicopter will be used to support the drill and personnel during summer months from a construction camp (Knox Camp) near Knox Lake, approx. 7 km away. In winter, personnel will be transported to site by light duty and off-road vehicles from the camp. In addition, during summer, personnel can also use a tracked ATV to access the area.

How will you be mobilizing/demobilizing equipment to and from the exploration site for all activities? Describe in detail.

Excavators (Linkbelt 210) will be used to construct temporary access trails and move the drill and fuel to the site. The excavators and diamond drills are currently on site. When the work program is completed the equipment will be demobilized along the existing trail during winter months.

What type of equipment will you be using for all of the early exploration activities?

Hydracore drills mounted inside sea containers capable of drilling 800m will be used for diamond drilling on the project. Portable rock saws will be used to complete channeling. The excavator and wajax pumps will be used for stripping.

What type of drilling will take place? (e.g. core drilling, reverse circulation)  
Core drilling with the drill capable of depths up to 800m will be used

Do you anticipate the removal of the drill casing?

☐ Yes ☒ No

If yes, when will you be removing it?

☐ Immediately ☐ 3 to 6 months ☐ 6 to 12 months ☐ 1 to 2 years

For the exploration activities you have selected in your early exploration submission please fill in the associated details (required for all activities proposed). \*

- ☒ Ground geophysical surveys without a generator
- ☒ Airborne geophysical surveys

Are you planning to store fuel or other hazardous materials on the property? \*

☒ Yes ☐ No

Please provide any other information relevant to this project.

The drilling project will be support by Frontier's Knox construction camp located approx. 7 km away. All fuel stored in certified containers. Minimal access trail beyond existing trails is required.
