## 2. Exploration Logistics and Detailed Information

Will explosives be used for any activity/activities? If yes describe in detail which activities require the explosives, where they will be stored, and any other relevant information.

NO

What commodity or commodities are being sought in the work program?

Gold in sought after

How will you be transporting personnel to the exploration site for all activities? Describe in detail.

Pickup trucks will travel a gravel road north from Highway 11/17 to some new forestry cuts. An old gravel road branches from the forestry activity south and transects through the property back to highway 11/17.

How will you be mobilizing/demobilizing equipment to and from the exploration site for all activities? Describe in detail.

To mob/demob equipment, the flatbed trucks will travel the gravel road to the north of the property to the area of forestry activity from Highway 11/17. From there, equipment will be skidded down the road that transects the property.

What type of equipment will you be using for all of the early exploration activities?

Quads and chainsaws will be used for linecutting.

Quads and an excavator will be utilized for stripping of overburden/trenching. Rock saws with diamond blades will be used to cut rock. Water pumps will be used to wash trenches.

A generator may be used for ground geophysics.

Drilling will use pickups, quads, dozer, water pump shack and diamond drill on skids.

What type of drilling will take place? (e.g. core drilling, reverse circulation)

Core drilling is anticipated to take place.

Do you anticipate the removal of the drill casing?

☐ Yes ☒ No

If yes, when will you be removing it?

☐ Immediately ☐ 3 to 6 months ☐ 6 to 12 months ☐ 1 to 2 years

For the exploration activities you have selected in your early exploration submission please fill in the associated details (required for all activities proposed). \*
