

AMENDED ENVIRONMENTAL COMPLIANCE APPROVAL

NUMBER 5583-DN5LCU
Issue Date: January 20, 2026

C.H. Demill Holdings Inc.
13 Melrose Road, R.R. #1
Shannonville, Ontario
K0K 3A0

Site Location: Long's Quarry and Melrose Quarry
13 Melrose Road, R.R. #1
Part of Lot 6, Concession 3 (Blessington)
Township of Tyendinaga, County of Hastings
K0K 3A0

You have applied under section 20.2 of Part II.1 of the Environmental Protection Act, R.S.O. 1990, c. E. 19 (Environmental Protection Act) for approval of:

existing Works for dewatering of the extraction areas of the Long's Quarry (approximately 24 ha licensed area) and the immediately adjacent to east Melrose Quarry (approximately 14 ha licensed area) designed for the collection, transmission, treatment and disposal of precipitation and groundwater accumulating within the confines of the Long's Quarry and Melrose Quarry extraction areas, discharging up to 2,740 L/min to a maximum 3,945,600 L/day, with treated effluent discharging on an as needed basis via a 200 mm diameter pipe in a general easterly direction onto a rip-rap apron/mat and dispersing on to the top of the bank of Blessington Creek, which is the final receiver of the treated effluent discharge, the existing Works located in proximity of the southern Long's Quarry site boundary, consisting of the following:

Settling Basin Arrangement

- one (1) ponding area/primary settling pond located in the extraction area of the Long's Quarry, having a surface area of 14,000 m² and a storage depth of 0.7 m, providing approximate storage provision of 4,900 m³ with the runoff directed centrally towards a settling pond, and decanting to it after passing through a clear stone berm/check dam, minimum 0.7 m high, with 0.5 m top width and complete with filter fabric that surrounds the secondary settling pond described below;
- one (1) 20 m long x 1.5 m deep secondary settling pond, having a permanent pool storage volume of 1,060 m³, decanting to a sump pit through a clear stone berm/check dam surrounding the pit which is minimum 0.7 m high, with 0.5 m top width and complete with filter fabric, and with the sump pit and pumping equipment

as described below;

Quarry Sump and Pump Arrangement

- one (1) minimum 5 m x 5 m x 1.5 m deep sump, equipped with a 30 HP pump, placed so the pump intake is minimum 0.5 m above pit bottom, with pumped effluent conveyed to the top of the bank of Blessington Creek via a rip-rap apron/mat consisting of a 8 m x 15 m x 0.3 m thick gabion mat base with pipe from the quarry sump discharging on to the mat, designed to dissipate the energy of the discharge water from the settling basin, with maximum discharge rate not to exceed 2,740 L/min to a maximum 3,945,600 L/day;

all in accordance with the supporting documents listed in Schedule "A".

For the purpose of this environmental compliance approval, the following definitions apply:

"Approval" means this Environmental Compliance Approval and any Schedules to it, including the application and supporting documentation listed in Schedule "A";

"Director" means any Ministry employee appointed by the Minister pursuant to section 5 of the Ontario Water Resources Act;

"District Manager" means the manager of Ministry District Office with responsibility for the geographic area of Tyendinaga Township;

"Ministry" means the ministry of the government of Ontario responsible for the EPA and OWRA and includes all officials, employees or other persons acting on its behalf;

"Owner" means C. H. Demill Holdings Inc. and includes its successors and assignees;

"Works" means the sewage works described in the Owner's application, this Approval and in the supporting documentation referred to herein, to the extent approved by this Approval.

You are hereby notified that this environmental compliance approval is issued to you subject to the terms and conditions outlined below:

TERMS AND CONDITIONS

1. GENERAL CONDITION

- (1) Except as otherwise provided by these conditions, the Owner shall design, build, install, operate and maintain the Works in accordance with the description given in this Approval, the application for approval of the Works and the submitted supporting documents and plans and specifications as listed in this Approval.
- (2) Where there is a conflict between a provision of any submitted document referred to in this Approval and the conditions of this Approval, the conditions in this Approval shall take precedence, and where there is a conflict between the listed submitted documents, the document

bearing the most recent date shall prevail.

2. CHANGE OF OWNER

- (1) The Owner shall notify the District Manager and the Director, in writing, of any of the following changes within 30 days of the change occurring:
 - (a) change of Owner or operating authority, or both;
 - (b) change of address of Owner or operating authority or address of new owner or operating authority;
 - (c) change of partners where the Owner or operating authority is or at any time becomes a partnership, and a copy of the most recent declaration filed under the Partnerships Registration Act;
 - (d) change of name of the corporation where the Owner or operator is or at any time becomes a corporation, and a copy of the most current "Initial Notice or Notice of Change" (Form 1, 2 or 3 of O. Reg. 189, R.R.O. 1980, as amended from time to time), filed under the Corporations Information Act shall be included in the notification to the District Manager;
- (2) In the event of any change in ownership of the Works, the Owner shall notify in writing the succeeding owner of the existence of this Approval (including providing a copy of this Approval to the succeeding owner), and a copy of such notice shall be forwarded to the District Manager.
- (3) The Owner shall ensure that all communications made pursuant to this condition will refer to this Approval's number.

3. OPERATION AND MAINTENANCE

- (1) The Owner shall ensure that at all times, the Works and related equipment and appurtenances which are installed or used to achieve compliance with this Approval are properly operated and maintained. The Owner shall also ensure that all monitoring programs and maintenance schedules for the Works and related equipment are complied with.
- (2) The Owner shall ensure that in the event of a spill or other contaminant release which could cause any detrimental effects on the quality of water discharging from the site, any pumping activities/discharge from the site are immediately ceased. Furthermore, the Owner shall ensure that any pumping activities/discharge from the site are resumed only after an investigation of the incident is undertaken, remedial and preventive measures are taken (if necessary) and the effluent discharged from the site is deemed not to cause any impairment to the receiving watercourses.
- (3) The Owner shall immediately cease any pumping activities/discharge from the site due to actual or potential flooding in the receiving Blessington Creek when there is a flood warning in place for the watershed issued by the Quinte Conservation (posted on the Quinte Conservation website)

or when there is an emergency declared/posted by the Township of Tyendinaga (i.e. road closure due to flooding etc.). Furthermore, the Owner shall ensure that any pumping activities/discharge from the site are only resumed upon a mutual agreement with the Quinte Conservation and the Township of Tyendinaga and that the effluent from the Works will not cause flooding or erosion in the watershed.

- (4) During periods of discharge from the Works that occur within 48 hours of a significant precipitation event (i.e. ≥ 25 mm of rain received), the Owner shall ensure that:
 - a. Turbidity of the discharge water is monitored at least twice daily and at least 4 hours apart during the operating hours permitted by the Aggregate Resource Act Licence;
 - b. Should a single turbidity measurement exceed 20 NTU, discharge will cease until field-measured turbidity is below 20 NTU;
 - c. A sample of the discharge water is collected and submitted to an accredited lab for analysis of the effluent parameters outlined in Table 2 when field measured turbidity exceeds 20 NTU;
 - d. All monitoring records are to be kept on file for inspection by a Provincial Officer upon request; and
 - e. The site-specific relationship between TSS and turbidity be reassessed at least annually.
- (5) The Owner shall ensure that the maximum discharge rate from the Works does not exceed 2,740 L/min and the maximum discharge from the Works does not exceed 3,945,600 L/day.
- (6) The Owner shall undertake regular inspections of the ponding area/primary settling pond, the secondary settling pond and the quarry sump, and have excess settled material cleaned-out on a regular basis with results recorded in a log book to be made available for review by the Ministry upon request. The log shall include the name of the inspector, date of inspection and description of cleaning and maintenance measures undertaken for the Works.
- (7) Within three (3) months of the issuance date of this Approval, the Owner shall prepare/update an operations manual for the operation of the Works that includes, but is not necessarily limited to, the following information:
 - (a) operating procedures for routine operation of the Works, including contingency plans for discharge during major rain events;
 - (b) contingency plan for planned discharge event where Effluent Limit requirements as outlined in Condition 4 subsection (1) are not met;
 - (c) inspection programs, including frequency of inspection for the Works and the methods or tests employed to detect when maintenance is necessary, as well as downstream receiver inspections for the occurrence of erosion and flooding;

- (d) repair and maintenance programs, including the frequency of repair and maintenance for the Works;
 - (e) contingency plans and procedures for dealing with potential spill, bypasses and any other abnormal situations and for notifying the District Manager; and
 - (f) complaint procedures for receiving and responding to public complaints.
- (8) The Owner shall maintain the operations manual up to date through revisions undertaken from time to time and retain a copy at the location of the Works. Upon request, the Owner shall make the manual available for inspection and copying by Ministry personnel.

4. EFFLUENT LIMITS

- (1) The Owner shall design, construct, operate and maintain the Works such that the concentrations of the materials named below as effluent parameters are not exceeded in the effluent from the Works:

Table 1 Effluent Limits	
Effluent Parameter	Concentration Limits (milligrams per litre unless otherwise indicated)
<i>Column 1</i>	<i>Column 2</i>
Total Suspended Solid (TSS)	25
pH of the effluent maintained between 6.5 to 8.5, inclusive, at all times	

- (2) For the purposes of determining compliance with and enforcing subsection (1), the following applies:
- (a) non-compliance with respect to pH limit is deemed to have occurred when any single measurement for pH of discharge effluent is out of the 6.5 - 8.5 range.
 - (b) non-compliance with respect to the TSS limit is deemed to have occurred when any single sample of TSS in the discharge effluent is over 25 mg/L.

5. EFFLUENT - VISUAL OBSERVATIONS

- (1) Notwithstanding any other condition in this Approval, the Owner shall ensure that the effluent from the Works is essentially free of floating and settleable solids and does not contain oil or any other substance in amounts sufficient to create a visible film, sheen or foam on the receiving waters.

6. MONITORING AND RECORDING

The Owner shall carry out the following monitoring program upon issuance of this Approval:

- (1) All samples and measurements taken for the purposes of this Approval are to be taken at a time and in a location characteristic of the quality and quantity of the effluent stream over the time period being monitored.
- (2) Samples shall be collected of the effluent discharged to Blessington Creek from the settling pond and surface water within the Creek. The samples shall be analyzed at the sampling frequencies and locations specified, using the sample type specified, and for each parameter listed below:

Table 2 - Effluent and Surface Water Monitoring	
Frequency	<p>Effluent Discharge - Once each month (during periods of effluent discharge from the Quarry i.e. during dewatering operations)</p> <p>Surface Water Monitoring - Quarterly (once every three months) (spring, summer, early fall and late fall period seasons), when the creek is likely to be flowing and reasonably accessible</p>
Sample Type	Grab
Parameters	<p>- Total Suspended Solids, Total Dissolved Solids, Total Kjeldahl Nitrogen, Total Ammonia Nitrogen, Nitrate & Nitrite as N, Sulphate, Chloride, Sodium, Iron, Total Phosphorus, Hydrogen Sulphide, pH, Temperature, Conductivity, Turbidity, Colour, Dissolved Oxygen,</p> <p>Effluent only: Total Petroleum Hydrocarbons (F1 to F4) (at the outlet of pipe conveying flow from quarry sump to the rip-rap apron/mat)</p>
Sampling Locations	<p>Effluent Sampling - settling pond discharge to Blessington Creek E-1: at the outlet of pipe conveying flow from quarry sump to the rip-rap apron/mat.</p> <p>Surface water monitoring and sampling (Stream stage measuring stations/monitoring location along Blessington Creek as shown on Figure 3 of the design report titled "Application for Amendments, Environmental Compliance Approval (ECA) 9075-AHNKJD, C.H. Demill Holdings Inc., Part of Lot 6, Concession 3 (Blessington), Township of Tyendinaga" dated June 2024 and prepared by Oakridge Environmental Ltd.</p> <p>Station S-2: upgradient station for conditions immediately above the quarry site licensed boundary, situated upstream of the wastewater discharge point;</p> <p>Station S-1: downgradient station for conditions immediately below the quarry outlet located immediately downstream of the wastewater discharge point.</p>

- (3) The Conductivity, Temperature, pH, Turbidity, Dissolved Oxygen and Total Dissolved Solids shall be measured and recorded in the field at the time of sampling. The concentration of

un-ionized ammonia shall be calculated using the total ammonia concentration, pH and temperature using the methodology stipulated in "Ontario's Provincial Water Quality Objectives" dated July 1994, as amended, for ammonia (un-ionized).

- (4) The methods and protocols for sampling, analysis, and recording shall conform, in order of precedence, to the methods and protocols specified in the following:
 - (a) the Ministry's publication "Protocol for the Sampling and Analysis of Industrial/Municipal Wastewater" (January 1999), ISBN 0-7778-1880-9, as amended from time to time by more recently published editions; and
 - (b) the publication "Standard Methods for the Examination of Water and Wastewater" (22nd edition) as amended from time to time by more recently published editions.
- (5) The Owner shall maintain a daily record of all water takings from all permitted sources, including measuring, recording and calculating the flowrate of water discharged from the settling pond. A totalizing flow meter, within an accuracy of plus or minus 15% of the actual flowrate, shall be utilized to monitor water takings from the settling pond sump.
- (6) The measurement frequencies and the analytical parameters specified in subsections (2) are minimum requirements which may be modified by the District Manager in writing from time to time. Any change to the monitoring and recording program can only be implemented upon receiving concurrence from the District Manager in writing.
- (7) The Owner shall retain for a minimum of three (3) years from the date of their creation, all records and information related to or resulting from the monitoring activities required by this Approval.

7. SPILL CONTINGENCY AND POLLUTION PREVENTION PLAN

- (1) Within three (3) months of the date of this Approvals, the Owner shall implement a Spill Contingency and Pollution Prevention Plan that includes, but is not necessarily limited to, the following information:
 - (a) the name, job title and location (address) of the Owner, person in charge, management or person(s) in control of the facility;
 - (b) the name, job title and 24-hour telephone number of the person(s) responsible for activating the Spill Contingency and Pollution Prevention Plan;
 - (c) a site plan drawn to scale showing the facility, nearby buildings, streets, drainage patterns, any receiving body(ies) of water that could potentially be significantly impacted and any features which need to be taken into account in terms of potential impacts on access and response (including physical obstructions and location of response and clean-up equipment);

- (d) steps to be taken to report, contain, clean up and dispose of contaminants following a spill;
 - (e) a listing of telephone numbers for: local clean-up company(ies) who may be called upon to assist in responding to spills; local emergency responders including health institution(s); and MOE Spills Action Centre 1-800-268-6060;
 - (f) Materials Safety Data Sheets (MSDS) for each hazardous material which may be transported or stored within the area serviced by the Works;
 - (g) the means (internal corporate procedures) by which the Spill Contingency and Pollution Prevention Plan is activated and a description of the Trigger Mechanism(s);
 - (h) a description of the spill response and pollution prevention training provided to employees assigned to work in the area serviced by the Works, the date(s) on which the training was provided and by whom;
 - (i) an inventory of response and clean-up equipment available to implement the Spill Contingency and Pollution Prevention Plan, location and, date of maintenance/replacement if warranted; and
 - (j) the date on which the Spill Contingency and Pollution Prevention Plan was prepared and subsequently, amended.
- (2) The Spill Contingency and Pollution Prevention Plan shall be kept in a conspicuous, readily accessible location on-site.
 - (3) The Spill Contingency and Pollution Prevention Plan shall be amended from time to time as required by changes in the operation of the facility and include a copy of any updated version with the Annual Performance Report.

8. REPORTING

- (1) One week prior to the commencement of dewatering each calendar year, the Owner shall notify the District Manager (in writing) of the pending commencement date.
- (2) The Owner shall report to the District Manager or designate, any exceedance of any parameter specified in Condition 4 orally, as soon as reasonably possible, and in writing within seven (7) days of the exceedance.
- (3) The Owner shall report to the District Manager or designate, any activation of the Contingency Plan, as soon as reasonably possible.
- (4) In addition to the obligations under Part X of the EPA and O. Reg. 675/98 (Classification and Exemption of Spills and Reporting of Discharges) made under the EPA, the Owner shall, within fifteen (15) days of the occurrence of any reportable spill as provided in Part X of the EPA and

O. Reg. 675/98, submit a full written report of the occurrence to the District Manager describing the cause and discovery of the spill, clean-up and recovery measures taken, preventative measures to be taken and a schedule of implementation.

- (5) The Owner shall, upon request, make all manuals, plans, records, data, procedures and supporting documentation available to Ministry staff.
- (6) The Owner shall prepare and submit a performance report to the District Manager on an annual basis within ninety (90) days following the end of the calendar year for the first three years following issuance of this Approval, thereafter the annual performance reports must be retained at the Site for at least five years and be made available upon request. The first performance report shall cover the first annual period following the issuance of this Approval, and subsequent reports shall be submitted to cover successive annual periods following thereafter. The reports shall contain, but shall not be limited to, the following information:
 - (a) a summary and interpretation of all monitoring data and a comparison to the Effluent Limits outlined in Condition 4, including an overview of the success and adequacy of the Works;
 - (b) a comparison of the parameters of the discharge monitoring results to Ontario Provincial Water Quality Objectives and Canadian Water Quality Guidelines (as applicable), including a discussion of any exceedances and/or trends, and recommendations for any corrective actions needed;
 - (c) a summary and description of events when the Contingency Plan was activated during the reporting period;
 - (d) a summary of any effluent quality assurance or control measures undertaken during the reporting period;
 - (e) a description of any operating problems encountered and corrective actions taken;
 - (f) a summary of all maintenance carried out on any major structure, equipment, apparatus, mechanism or thing forming part of the sewage works;
 - (g) a summary of any alterations, extensions or replacements in the process or operation of the Works which may be under consideration for implementation over the next reporting period, especially those that may require amendment of the current approval; and
 - (h) a summary of the suspended solids handling activities undertaken for clean up of the sump and settling basins;
 - (i) a summary of any complaints received and any steps taken to address the complaints; and
 - (j) any other information the District Manager requires from time to time.

The reasons for the imposition of these terms and conditions are as follows:

1. Condition 1 is imposed to ensure that the Works are built and operated in the manner in which they were described for review and upon which Approval was granted. This condition is also included to emphasize the precedence of conditions in the Approval and the practice that the Approval is based on the most current document, if several conflicting documents are submitted for review.
2. Condition 2 is included to ensure that the Ministry records are kept accurate and current with respect to approved Works and to ensure that subsequent owners of the Works are made aware of the Approval and continue to operate the Works in compliance with it.
3. Condition 3 is included to ensure that a comprehensive operations manual governing all significant areas of operation, maintenance and repair is prepared, implemented and kept up-to-date by the Owner and made available to the Ministry. Such a manual is an integral part of the operation of the Works. Its compilation and use should assist the Owner in staff training, in proper operations and in identifying and planning for contingencies during possible abnormal conditions. The manual will also act as a benchmark for Ministry staff when reviewing the Owner's operation of the Works.
4. Conditions 4 and 5 are imposed to ensure that the effluent discharged from the Works meets the Ministry's effluent quality requirements thus minimizing environmental impact on the receiver.
5. Condition 6 is included to require the Owner to demonstrate on a continual basis that the quality and quantity of the effluent from the approved Works is consistent with the Effluent Limits specified in the Approval and that the approved Works do not cause any impairment to the receiver.
6. Condition 7 is included to ensure that the Owner will implement the Spill Contingency and Pollution Prevention Plan, such that the environment is protected and deterioration, loss, injury or damage to any person(s) or property is prevented.
7. Condition 8 is included to provide a performance record for future references and to ensure that the Ministry is made aware of problems as they arise, so that the Ministry can work with the Owner in resolving the problems in a timely manner.

Schedule "A" forms part of this Approval and contains a list of supporting documentation/information received, reviewed and relied upon in the issuance of this Approval.

SCHEDULE "A"

1. Application for Environmental Compliance Approval submitted by Dan MacIntyre, B.Sc., Project Manager, Oakridge Environmental Ltd., dated September 10, 2024 and received on September 12, 2024.
2. The design report titled "Application for Amendments, Environmental Compliance Approval (ECA) 9075-AHNKJD, C.H. Demill Holdings Inc., Part of Lot 6, Concession 3 (Blessington), Township of Tyendinaga" dated June 2024 and prepared by Oakridge Environmental Ltd.
3. The design report titled "Environmental Compliance Application, ECA # 9075-AHNKJD, C.H. Demill Holdings Inc., Part Lot 6, Concession 3, Township of Tyendinaga" dated December 16, 2025 and prepared by Bruno Dobri, P.Eng., Dobri Engineering Ltd.
4. All other information and documentation provided by Oakridge Environmental Ltd.
5. Environmental Compliance Approval Application submitted by Brian R. King, P.Geo., Oakridge Environmental Ltd., dated April 8, 2016 and received March 24, 2016.
6. Design Report titled "Application for Amendments Environmental Compliance Approval (ECA) 2835-9WUPBM, C.H. Demill Holdings Inc. (Long's Quarry), Part of Lot 6, Concession 3 (Blessington), Township of Tyendinaga," dated March 2016, specifications and engineering drawings, all prepared by Oakridge Environmental Ltd.
7. Addendum #2 to Technical Submission titled "Addendum #2 to Application for Amendments, Environmental Compliance Approval (ECA) 2835-9WUPBM, C.H. Demill Holdings Inc. (Long's Quarry), Part of Lot 6, Concession 3 (Blessington), Township of Tyendinaga, ORE File No. 15-2106" dated January 19, 2017, prepared by Oakridge Environmental Ltd.
8. Addendum #3 to Technical Submission titled "Addendum #3, Application for Amendments, Environmental Compliance Approval (ECA) 2835-9WUPBM, C.H. Demill Holdings Inc. (Long's Quarry), Part of Lot 6, Concession 3 (Blessington), Township of Tyendinaga, ORE File No. 15-2106" dated January 20, 2017, prepared by Oakridge Environmental Ltd.
9. Addendum #4 to Technical Submission titled "Addendum #4, Application for Amendments, Environmental Compliance Approval (ECA) 2835-9WUPBM, C.H. Demill Holdings Inc. (Long's Quarry), Part of Lot 6, Concession 3 (Blessington), Township of Tyendinaga, ORE File No. 15-2106" dated March 23, 2017, containing the Updated Contingency Plan - revised March 23, 2017

titled "Environmental Compliance Approval (ECA), C.H. Demill Holdings Inc., Long's Quarry, 13 Melrose Road, Shannonville, Ontario", both documents prepared by Oakridge Environmental Ltd.

10. Memorandum titled "C. H. Demill Holdings Inc. Long's Quarry - ECA Amendment Application, 13 Melrose Road, Part of Lot 6, Concession 3 (Blessington), Township of Tyendinaga, County of Hastings, ECA Number 2835-9WUPBM" dated September 27, 2016, to J. Morrish Senior Environmental Officer, Belleville Area Office, Eastern Region, from B.W. Metcalfe Senior Environmental Officer, Water Resources Unit – Surface Water Group, Technical Support Section Eastern Region, and V. Castro, Group Leader Surface Water, Water Resources Unit – Surface Water Group, Technical Support Section, Eastern Region.
11. Addendum to Technical Submission titled "Addendum to Application for Amendments, Environmental Compliance Approval (ECA) 2835-9WUPBM, C.H. Demill Holdings Inc. (Long's Quarry), Part of Lot 6, Concession 3 (Blessington), Township of Tyendinaga, ORE File No. 15-2106" dated June 20, 2016, prepared by Oakridge Environmental Ltd.
12. Environmental Compliance Approval Application submitted by Mr. Bruno Dobri, P.Eng. of Dobri Engineering Ltd., dated October 15, 2014 and received on October 20, 2014, including a memo entitled Amendment - Environmental Compliance Application, Reference 7480-9Q3S6G, ECA#4008-93RJMM, Industrial Sewage Works, H. Demill Holdings Inc. Long's Quarry, Part Lot 6, Concession 3 Township of Tyendinaga, dated December 2, 2015 and prepared by Dobri Engineering Ltd.
13. "As - Constructed" engineering drawings dated September 25, 2014 and received on October 6, 2014, prepared by Dobri Engineering Ltd.
14. Application for Approval of Industrial Sewage Works submitted by Mr. Bruno Dobri, P.Eng. of Dobri Engineering Ltd., dated May 3, 2012 and received on May 24, 2012, including a report entitled, Environmental Compliance Application Design Brief for Industrial Sewage Works Long's Quarry, dated May 18, 2012, including enclosed engineering drawings.
15. Contingency Plan submitted by Mr. Bruno Dobri, for quarry discharge dated August 7, 2013.
16. Electronic mail from M. Dan Joyner, Sr. Environmental Officer, Belleville Area Office and Mr. Victor Castro, Group Leader Surface Water, Eastern Region Technical Support Section to Sr. Review Engineer, Fariha Pannu, P.Eng., dated July 29, 2013 regarding effluent limits and monitoring regime.
17. Revised Engineering Design Brief and drawings submitted by Mr. Dobri to Ms. Pannu via electronic mail dated July 12, 2013.
18. Electronic mail dated February 14, 2013 from Mr. Dobri to Ms. Pannu, including all attachments, submitted in response to request for additional information.
19. Memoranda dated October 3, 2012 and May 07, 2012 from Mr. B. W. Metcalfe, Sr. Environmental

Officer, Eastern Region Technical Support Section to Mr. D. Joyner, Sr. Environmental Officer, Belleville Area Office regarding surface water impact review.

20. Memorandum dated May 9, 2012 from Mr. Robert W. Holland, Hydrogeologist, Eastern Region Technical Support Section to Mr. Joyner regarding proposed monitoring program of the quarry.

Upon issuance of the environmental compliance approval, I hereby revoke Approval No(s). 9075-AHNKJD issued on March 27, 2017.

In accordance with Section 139 of the *Environmental Protection Act*, you may by written notice served upon me, the Ontario Land Tribunal and in accordance with Section 47 of the *Environmental Bill of Rights*, 1993, the Minister of the Environment, Conservation and Parks, within 15 days after receipt of this notice, require a hearing by the Tribunal. The Minister of the Environment, Conservation and Parks will place notice of your appeal on the Environmental Registry. Section 142 of the *Environmental Protection Act* provides that the notice requiring the hearing ("the Notice") shall state:

- a. The portions of the environmental compliance approval or each term or condition in the environmental compliance approval in respect of which the hearing is required, and;
- b. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

Pursuant to subsection 139(3) of the *Environmental Protection Act*, a hearing may not be available with respect to any terms and conditions in this environmental compliance approval, if the terms and conditions are substantially the same as those contained in an approval that is amended or revoked by this environmental compliance approval.

The Notice should also include:

1. The name of the appellant;
2. The address of the appellant;
3. The environmental compliance approval number;
4. The date of the environmental compliance approval;
5. The name of the Director, and;
6. The municipality or municipalities within which the project is to be engaged in.

And the Notice should be signed and dated by the appellant.

This Notice must be served upon:

Registrar*
Ontario Land Tribunal
655 Bay Street, Suite 1500
Toronto, Ontario
M5G 1E5
OLT.Registrar@ontario.ca

and

The Minister of the Environment,
Conservation and Parks
777 Bay Street, 5th Floor
Toronto, Ontario
M7A 2J3

and

The Director appointed for the purposes of
Part II.1 of the *Environmental Protection Act*
Ministry of the Environment,
Conservation and Parks
135 St. Clair Avenue West, 1st Floor
Toronto, Ontario
M4V 1P5

*** Further information on the Ontario Land Tribunal's requirements for an appeal can be obtained directly from the Tribunal at: Tel: (416) 212-6349 or 1 (866) 448-2248, or www.olt.gov.on.ca**

This instrument is subject to Section 38 of the *Environmental Bill of Rights*, 1993, that allows residents of Ontario to seek leave to appeal the decision on this instrument. Residents of Ontario may seek leave to appeal within 15 days from the date this decision is placed on the Environmental Registry. By accessing the Environmental Registry at <https://ero.ontario.ca/>, you can determine when the leave to appeal period ends.

The above noted activity is approved under s.20.3 of Part II.1 of the *Environmental Protection Act*.
DATED AT TORONTO this 20th day of January, 2026

Fariha Pannu, P.Eng.

Director

appointed for the purposes of Part II.1 of the
Environmental Protection Act
