A. I, the Director, am satisfied that:

1. The applicant has submitted a completed application for registration dated March 14th, 2025, signed by Ron Beaulieu, President and this application was in a form approved by the Director.
2. The information submitted in the application is accurate, to the best of my knowledge.
3. The Metal Finishers – Industry Standard applies to the Facility since it is a decorative chromium and nickel electroplater and is part of a class identified by the NAICS code 332810.
4. The Metal Finishers – Industry Standard applies to the Registered Contaminants.
5. The Metal Finishers – Industry Standard contains requirements that relate to at least one source of contaminant in the Facility, namely, hard chromium electroplating.
6. There are no provisions in the Metal Finishers – Industry Standard that deal with notification of and consultation with affected persons before making an application for registration.
7. There were no requirements to notify and consult affected persons imposed under subsection 39(5).
8. Any adverse effect that may be caused by discharges of the Registered Contaminant from the Facility into the air will be better prevented, eliminated or ameliorated if the Facility and the Registered Contaminants are registered to the Metal Finishers – Industry Standard.
9. There is no other industry standard that applies to the Facility and the Registered Contaminants that, in my opinion, would be more appropriate.
10. Based on the public consultation conducted including a posting on the Environmental Registry under the Environmental Bill of Rights, I am of the opinion that there is no public interest reason sufficient to refuse approval of the application.
