The drill pads have been given a 200m buffer for the collar location. Drill pads will be approximately ~20-30m in diameter. more than one hole from each collar location and there will likely be more than one drill location within each pad. Natural clearings will be utilized for drilling locations, where possible, to avoid cutting trees. Casings will be sunk to ground level or cut off. Long suction hoses will be used for the water supply to minimize shoreline disturbance. No drilling will be conducted within 30m of a water body.

We anticipate staying at an existing lodge on Mameigwess Lake or existing camp on Rowlandson Lake.
