2. Exploration Logistics and Detailed Information

Will explosives be used for any activity/activities? If yes describe in detail which activities require the explosives, where they will be stored, and any other relevant information.

No

What commodity or commodities are being sought in the work program?

Gold

How will you be transporting personnel to the exploration site for all activities? Describe in detail.

Crews to stay in Dryden, travel south on Hwy 502, access to early exploration activity sites via existing MNRF roads/trails and creating trails.

How will you be mobilizing/demobilizing equipment to and from the exploration site for all activities? Describe in detail.

Travel south from Dryden on Hwy 502, then use existing MNRF roads/trails. Diamond Drill setup and heavy equipment transported via lowbed trailer, close to proposed collar locations on existing MNRF roads. Some trails will be created to access proposed collar locations.

What type of equipment will you be using for all of the early exploration activities?

Diamond drill, pump shack, heavy equipment (skidder or small dozer), ground geophysics equipment not requiring a generator, light vehicle (trucks), ATV/UTV, snowmobile.

What type of drilling will take place? (e.g. core drilling, reverse circulation)

Core drilling

Do you anticipate the removal of the drill casing?
