Proposed change: 1418

Support: I support this proposed change with modification(s).

Reason:

[2.2.7.7.] --- Direction of Exit Door Swing
[1] --) Except as permitted by Sentence (2), every exit door shall
[a] --) open in the direction of exit travel, and
[b] --) swing on its vertical axis.

Proposed:
[2.2.7.7.] --- Direction of Exit Door Swing
[1] --) Except as permitted by Sentence (2), every exit door shall
[a] --) swing INWARD UNDER LOW HUMAN OCCUPANCY (1.3.3.6. (1)) CONDITIONS, and
[b] --) swing on its vertical axis.

Recommend door swing to be inward to keep livestock plus allow door to open in winter months where it could possibly be blocked due to snow / ice. This will be integral to ability to exit.

REASONING:

Snow / Ice removal is not regulated on farm properties. Out swinging doors could as a result be blocked to snow and ice and therefore restrict a person from existing the facility safely. Climatic conditions for all provinces are to be considered for this aspect.
