**Environmental Registry of Ontario**

**ERO 025-0663: 2004295 Ontario Inc. – Caledon Aecon Pit**

Democracy Caledon hereby submits comments on ERO 025-0663.

Democracy Caledon is a collective of proactive people deeply committed to restoring good governance in the Town of Caledon, Ontario. We believe that strong communities are built on a foundation of transparency, accountability and engaged residents. Our focus is on advocating for responsible local and regional governance that serves the best interests of all residents.

As headwaters, we have a responsibility to protect our watersheds, which are essential for forests, wildlife habitats, delivering clean, cold water downstream, and supporting the growth of our food supply. Equally, we must help create opportunities for people to live and work in Caledon. Achieving both of these crucial goals in Caledon requires collaboration with our town council and staff.

We are dedicated to building a thriving, transparent, eco-conscious and inclusive Caledon for generations to come.

Democracy Caledon has significant concerns about the proposed site plan amendment by 2004295 Ontario Inc. to re-establish pre-existing grades and to revise the final use of the site from pond to agriculture. Our concerns are captured by the submission on ERO 025-0663 by Gravel Watch Ontario (GWO) and Democracy Caledon hereby fully endorses the Gravel Watch Ontario submission. The GWO submission is included as a Supporting Document in this online submission.

Sincerely,

Democracy Caledon  
Caledon, Ontario
